

Tibetan Buddhism – Practices – and Old Antiquity Practices

By Nagarjuna, and now Dalai Lama

I. Tibetan Practices

Always meditating, metaphysics, and even Existentialism merged to middle-path and always following each other in some metaphysical chanting or harmonies, which Sirohi breaks a lot into in fact antiquity as Nagarjuna and teaches only Existentialism in Satya Buddhism – we practice other traditions.

Dalai Lama here – we are all that ascetic – Sirohi denounces this a lot, and tells them that is middle-path that in fact we follow the hardships he thinks, actually we are monks.

II. Antiquity Practices – Nagarjuna

I am just running one day, joking another day, and following my life on studies another day.

It is just the fun of it.

I call it hardships on studies.
